Striving to procure truly diverse circuits into India?

Are you realizing during an outage that the “Diverse Circuit” which was ordered has a single point of failure with the primary?

Access Engineered for Diversity

Sify's Diversity Consulting and Engineering Service

- Full path study for a diverse access, from the specified point of interconnection to the customer site
 - end to end study from the NNI, covering Undersea Cables, Intercity Trunk routes and Local Access all the way up to the building entrances and ducts
 - detailed report about the various access options available, highlighting the single points of failure (if any)
 - both Sify Onnet and 3rd party access solutions available for a site included in the report
 - SLA indicators for each of the solutions offered
 - diverse build out options if available
- End to end commercial offer
 - commercials for each of the solutions provided in the report
 - consulting fee refunded if the solution is ordered on Sify

Sify's QuickConnect

- site activation in 10 business days* on Sify's Carrier Grade Fixed Wireless Access
- wireline access provisioning/buildout initiated in parallel
- service will be switched over to Wireline Access once wireline build out / provisioning is completed
- minimal downtime during switchover
- wireless reach to over 1300+ cities in India, giving unprecedented coverage
- QuickConnect Service at just an additional NRC

QuickConnect India

*Subject to wireless feasibility, QuickConnect service availability confirmation and bandwidth availability for the interim wireless access at the site will be confirmed on enquiry/site survey (in 5 business Days)

02

Long lead times due to access build-out delaying your service readiness?

03

Spending too much
on passive backup
circuits into India?

Sify's Shared Backup Solutions

- cost effective backup solutions for VPN into India from global interconnect locations
- shared port at NNI locations outside India, with burst capability
- backup port shared across customer circuits
- billing based on 95th percentile utilization on burst
- pay only for local access at a circuit level

Enables you to offer a completely diverse backup solution to a customer at very competitive prices

- not just local loop diversity, but cable system and provider level diversity
- completely redundant solutions including managed CPEs
- TCO of ~30% of provisioning backup using traditional models
