Governance Built Into the Private AI Stack

InfinitAIZEN is embedded in the HPE Unleash AI Partner Program and HPE Private Cloud AI, co-developed with NVIDIA, as the orchestration and governance layer. HPE customers get private AI infrastructure with a governed path to production agentic workflows.

sify

What It is Built to Improve

A governed path to production on HPE infrastructure

Workflows that run under enterprise identity

An air-gapped option with identical architecture

The Goal

Customers who invest in private AI infrastructure run governed production workflows on it early, instead of starting a new integration project. HPE offers infrastructure, orchestration, and governance together.

Why InfinitAIZEN

Outcomes, not just infrastructure
Customers need production workflows, not only GPUs and models. InfinitAIZEN supplies the orchestration layer.

Neutral governance
InfinitAIZEN is independent of any single application vendor, so it can govern all of them.

Built to be embedded
The A2A gateway and OEM model let a partner deliver InfinitAIZEN as part of its own stack.

InfinitAIZEN PRODUCTS
Orchestrate + Foresight

SYSTEMS
HPE GreenLake, HPE identity (IAM with mTLS)

DEPLOYMENT
Customer owned HPE infrastructure, including air-gapped sites

Methods Used

- Platform
- Integration
- Workflow
- Audit

How It Works

01 **Embed**
InfinitAIZEN is part of the HPE Private Cloud AI offer through the Unleash AI program.

■ Platform

■ Integration

Integrate **02**
InfinitAIZEN connects to HPE GreenLake and HPE identity, so workflows run under the enterprise identity.

03 **Deploy**
Customers run InfinitAIZEN on their own HPE infrastructure, including air-gapped sites, with identical architecture.

■ Platform

■ Workflow

Start **04**
Reusable workflows for IT and network operations, predictive maintenance, and document automation shorten the path to production.

05 **Govern**
Agent actions are attributed, policy-gated, and audited across the customer's systems.

■ Audit
